ENVIRONMENT & GREEN AUDIT REPORT

(2021-2022)

APPROVED

R. M. JAIN

6. Conclusion

Considering the fact that the institution is predominantly a higher education institute at a taluka place, there is significant environmental research both by faculty and students. The environmental awareness initiatives are substantial. Paperless work system and vermicomposting due to availability of space. Besides, environmental awareness programmes initiated by the administration shows how the campus is going green. Few recommendations are added to curb the menace of waste management using ecofriendly and scientific techniques. This may lead to the prosperous future in context of Green Campus & thus sustainable environment and community development.

As part of green audit of campus, we carried out the environmental monitoring of campus includes Illumination, Noise level, Ventilation and Indoor Air quality of the class room. It was observed that Illumination and Ventilation is adequate considering natural light and air velocity present. Noise level in the campus well within the limit i.e. below 50dB at daytime.

A great effort has been made to tackle the energy crisis issues through the installation and functioning of ultimate source of energy i.e. solar energy. As a rural institute our College initiated an activity to adopt eco-friendly lifestyle by the consumption of energy through solar source for which solar appliances have been installed on the college building. Our College installed Solar Panels of 10 KW grid on the terraces. It produces average 1200 to 1400 Units electricity per months and there are total four 70watt LED solar Street lights installed at campus.
