Baudhayana Sutra in Yajur Veda

Baudhayana Sulbasutra

दीर्घचतुरश्रस्याक्षया रज्जुः पार्श्वमानी तिर्यग्
मानी च यत् पृथग् भूते कुरुतस्तदुभयं करोति ॥

Baudhāyana used a rope as an example in the above shloka/verse, which can be translated as:

"A rope stretched along the length of the diagonal produces an area which the vertical and horizontal sides makes together"

$$c^2 = a^2 + b^2$$

The Sulbasutras is like a guide to the Vedas which formulate rules for constructing Vēdi (altars). They contain valuable information about the geometry of ancient India, including instructions for constructing sacrificial altars (vēdi) and locating sacred fires (agni). This formula is used in constructing Yajna Vēdi (altars) in the shape of an eagle with triangular tiles in a special type of Yajna called Agnicayana (a twelve day Yajna ceremony)

Concept Of Infinity defined by Bhaskaracharya

Definition of Infinity – Bhaskaracharya's Bijaganita
2.18

In Bijaganita, we find the following shlok

वधादौ वियत् खस्य खं खेन घाते खहारो भवेत् खेन भक्तश्च राशिः॥
vadhādaṁ viyat khasya khaṁ khena ghāte khahāro
bhabet khena bhaktaśca rāṣiḥ॥

A zero results when multiplied by zero, a “khahara”
(zero-divided, or infinity) results when a number is
divided by zero.

Law of Gravitation

Adi Shankaracharya who lived around 460 BCE, wrote in his commentary on the Upanishads: "If the divinity of the earth would not pull down this body by supporting apana*, this body would have floated anywhere in space."

The ancient Indian scholar **Varahamihira** said: "Planet earth being surrounded by various stellar bodies situated in space, is similar to an iron sphere remaining suspended between two magnets."

VIBGYOR in Rigveda

In Rigveda (Indrasukta-12), the word "Saptarashmi" is used which shows that vedic rishis knew clearly the basic hidden fact of seven colors in sunrays.

Since Rigvedic period i.e, 1500 B.C. Indian rishis before Aristotle or Newton have come to know about the secret of VIBGYOR.

Speed of Light

Speed of Light was actually determined accurately in Rig Veda thousands of years ago.

It was further elaborated by Sayana in 14th century AD.

The Rig Veda , an ancient Indian sacred text, said to be $\cong 7000$ years old, had a mysterious hym that gave the speed of light :

योजनानाम् सहस्रं ३ ३ शते ३ च योजने एकेन
निमिशार्धेन क्रम्पण नमोस्तुते ॥

(source: Rigveda, translation- G.V.Raghava Rao.)

"The sun's rays travels 2202 Yojanas in just half a Nimisha." The word "sahasra" means 1000, ३ is "dwe" ,means "2", and "shate" means 100.

Ancient Shipping & Navigation

The art of Navigation was born in the river Sindh more than 6000 years ago.

In Rigveda 1.25.7; 7.88.3 and other instances, Samudra (Ocean/Sea) is mentioned together with ships.

Some words that are used for ships are Nau, Peru, Dhi and Druma.

A ship with a hundred oars is mentioned in RV 1.116.

There were also ships with three masts or with ten oars.
